Respected Colleagues,

Greetings and warm regards!

MaxFacIndia is an organization - established at Pune, Maharashtra in 2017 - which is focused on the professional development of maxillofacial prosthodontics in India. This is being accomplished through the following means:

- **Patient Treatment Services** - for patients requiring maxillofacial prosthetic care.
- **Silicone Laboratory Services** - for clinicians requiring auxiliary support.
- **Partnership with Technovent Ltd., UK** - to make medical-grade silicone materials available.
- **Training Provider** - to provide hands-on training in maxillofacial prosthetics.

ABOUT THE PROGRAM

Exenteration of the eye is a surgical procedure that removes the eyeball and the surrounding tissues. This extensive surgery is performed to treat malignancy, mucormycosis, and traumatic injuries. The resultant facial defect is disfiguring and requires cosmetic rehabilitation with an orbital prosthesis.

An orbital prosthesis may be retained by means of anatomic undercuts, skin adhesives, spectacles, craniofacial implants, and combinations thereof. Other anatomic structures of the face (maxilla, nose, cheek) may also be involved in which case a larger and more complex midfacial prosthesis is planned for.

This 3-day hands-on training workshop will focus on the clinical and technical aspects involved in the fabrication of an adhesive-retained orbital prosthesis in medical-grade silicone - with emphasis on a simplified technique.

We look forward to your participation in the workshop.

..... Regards,

The Organizing Team
