**Respected Colleagues,**

Greetings and warm regards!

**MaxFacIndia** is an organization - established at Pune, Maharashtra in 2017 - which is focused on the professional development of maxillofacial prosthodontics in India. This is being accomplished through the following means:

- **Patient Treatment Services** - for patients requiring maxillofacial prosthetic care.
- **Silicone Laboratory Services** - for clinicians requiring auxiliary support.
- **Partnership with Technovent Ltd., UK** - to make medical-grade silicone materials available.
- **Training Provider** - to provide hands-on training in maxillofacial prosthetics.

**ABOUT THE PROGRAM**

Anaplastology or Maxillofacial Prosthetics is a branch of medicine dealing with the prosthetic rehabilitation of an absent, disfigured or malformed anatomically critical location of the face or body. Developing required clinical and laboratory skills in this field is a challenging task for the interested clinician.

Partial or complete absence of the ear (mostly due to congenital reasons) impacts the patient's self-image & standing in society. Reconstruction via plastic surgery vs artificial silicone replacements (retained by means of a skin adhesive &/or craniofacial implants) are treatment solutions.

This 3-days hand-on training workshop will focus on the technical aspects involved in the fabrication of an adhesive-retained auricular prosthesis in medical-grade silicone - with emphasis on a simplified technique.

We look forward to your participation in the workshop.

..... Regards,

**The Organizing Team**
