Respected Colleagues,

Greetings and warm regards!

MaxFacIndia is an organization - established at Pune, Maharashtra in 2017 - which is focused on the professional development of maxillofacial prosthodontics in India. This is being accomplished through the following means:

- **Patient Treatment Services** - for patients requiring maxillofacial prosthetic care.
- **Silicone Laboratory Services** - for clinicians requiring auxiliary support.
- **Partnership with Technovent Ltd., UK** - to make medical-grade silicone materials available.
- **Training Provider** - to provide hands-on training in maxillofacial prosthetics.

ABOUT THE PROGRAM

Anaplastology or Maxillofacial Prosthetics is a branch of medicine dealing with the prosthetic rehabilitation of an absent, disfigured or malformed anatomically critical location of the face or body. Developing required clinical and laboratory skills in this field is a challenging task for the interested clinician. Some of the fundamental and important skills to be learnt are impression making, sculpting, mould making, handling of medical-grade silicone, and colour matching to the patient.

A medical-grade silicone kit typically contains a platinum silicone system, intrinsic colourants, flocking agents, extrinsic colourants (with a sealant), and skin adhesives for the patient. It is our endeavour at MaxFacIndia to guide the interested learner on the above aspects with emphasis on a simplified technique.

We look forward to your participation in the workshop.

..... Regards,

The Organizing Team
